

**IN THE CLAIMS:**

1. (Once Amended) A method for providing an interface for accessing home devices that are currently connected to a home network, the method comprising the steps of:

generating a device link file, wherein the device link file identifies home devices that are currently connected to the home network;

5 creating a device link page from at least the local network; wherein the device link page contains a device button that is associated with each home device that is identified in the device link file;

associating a hyper-text link with each device button, wherein the hyper-text link provides a link to an HTML page that is contained on the home device that is associated with the  
10 device button; and

displaying the device link page on a browser based home device.
